

## Rotaract Club of College of Social Work Nirmala Niketan

### Treasure Hunt Report

The treasure hunt was organized for club members of the college. The event was headed by Ms. Nirmiti and Mr. Albin Thomas, faculty members in charge for Rotaract club. The group was divided into two teams, Team Green and Team Blue. Once the groups were formed, teams were given some time to search for clues and then move step by step towards the next hint. Both teams

came up with their own strategies. Some students were placed at different spots around the college campus, each holding a chit with our next hint. The fun twist was that whoever reached first had to complete a task given by the student holding the clue. We kept running from one location to another, solving clues and finishing tasks with excitement. In the end, after all the hustle and energy, Team Green emerged as the winner.

After the game, everyone shared their reflections. What stood out was that each of us learned something different from the activity. The biggest takeaway was the importance of teamwork, coordination, and cooperation. In one group, there was a bit of miscommunication, while the

other group showed better unity by listening to one another and moving forward together. This made us realize how essential unity is when working in a team—it makes communication smoother and the work more effective.

Through this Rotaract Club activity, our bonding as a group grew stronger. We got to know each other better, and most importantly, we learned that strong teamwork can truly help in achieving any goal.
