Vision Centre

Vision Centre has JAWS (Job Access with Speech) and NVDA (Nonvisual Desktop Access) which converts the computer into a talking computer. It reads out all the matter that is on the computer's screen through the computer's speakers/ headphones, thus enabling a visually challenged person to use the computer independently and work on all MS Windows applications.

- Supports English, Hindi & Marathi languages.
- Indian Accent Voice
- Precision Optical Character Recognition
- Rich Scanning and Reading
- Extensive Low Vision Features
- Powerful Document Navigation Tools
- Search and Download Books on the Internet
- Document Portability
- Share Information
- Enables the visually challenged to fill electronic forms in web pages
